And then find the item that you want to change.

You may see keywords already registered if you are using my bodyslides uploaded on my blog.

Check the folder if there's an extra plugin.

If this is your first time, I' II simply add one keyword `EroticArmor.`

Multiple supportive keywords are allowed to be added as many as you want.

Just make sure that only one main cuirass keyword is registered for each cuirass.

Close Tes5edit with save it. Done!!

P.S – This whole process may not be necessary. If you think it's hard to understand, just use Naked Armor feature on Sexlab Aroused MCM. Of course, it's not a perfect solution.
