Oh Moonshadow...

This has to work.

You have to wake up.

I have to tell you...

Need to show you...

How much I miss you.

A close-up shot of a woman's legs and hands. She is wearing black fingerless gloves and black shorts. Her legs are spread apart, and her hands are resting on her thighs. The background shows a futuristic, metallic environment with a "SEC 0" sign.

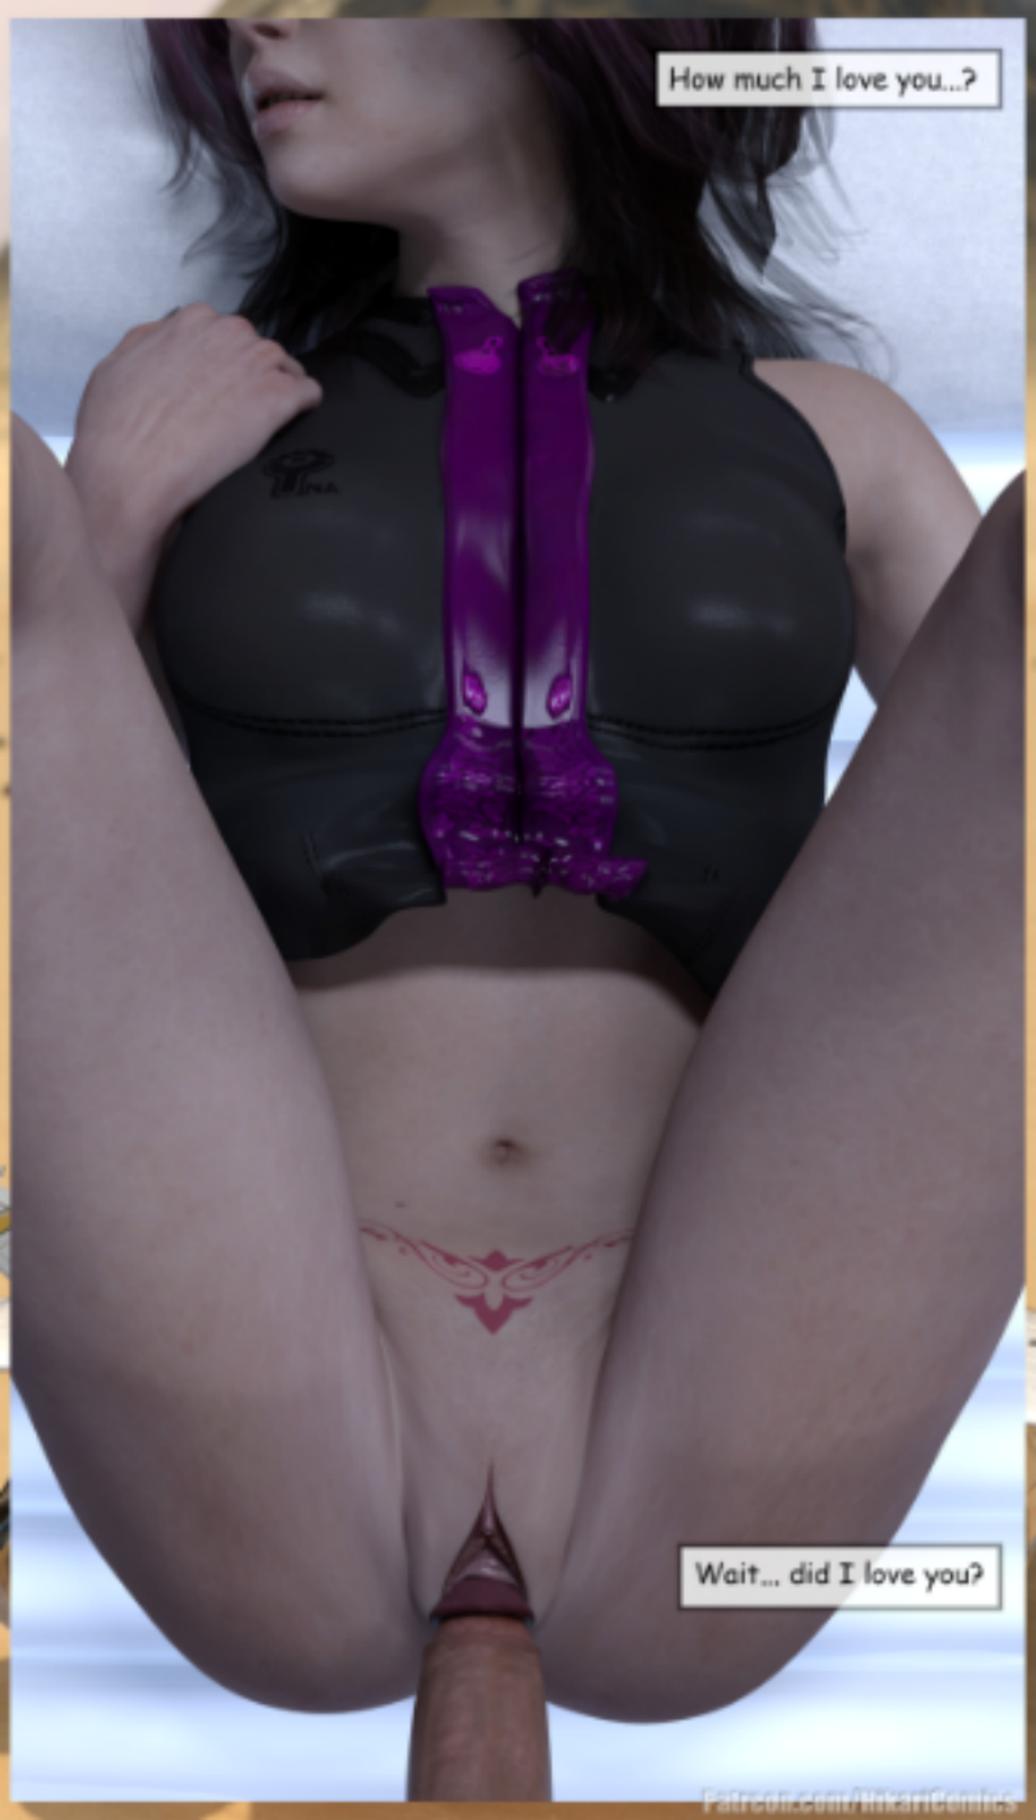

How much I need you...

A woman in a black outfit is kneeling on a metallic floor in a futuristic setting. She is looking down at a transparent, cylindrical object on the floor. The background shows a futuristic, metallic environment with blue and yellow lights.

How much I want you.

MANYKIND

Despite galactic law forbidding genetic experimentation on humans, in the ramp up to the Free Galaxy Union's height, it became fashionable to select long term modifications to family genetic lines. As a result, seemingly pointless evolutionary traits became dominant and pervasive. Where humans shared 99.99% genetic integrity, the new spectrum deviated by nearly 5%, making some of these new humans more different from each other than with the extinct ancient Great Teran Apes. Unable to interbreed, individual human-based species broke off from the agreed upon definition of "Human".

Before cooling down, every fantastic being that mankind had imagined was incarnated in some form, although with dispositions and culture not that divergent from their ancestors. Elves, Drow, Orc, Demon, Dwarfs, Gnomes, Centaur, Halfling, Dragonkin, Fairies, Dryad, Nymph, Wolves, Puppins, and the ever popular Neko cat girls.

Pure humans are once again the dominant race, most of the Manykind variants still exist to this day.

Hey...

Umm...

Hi Genji.

Yes...?

About before...

I'm sorry. I'm sorry!
Hmmm... I scared you.

It was just... I could feel
how excited Midori was and...

Yeah she's...

I'm sorry too. You just took me by
surprise. We've known each other for so long.
I didn't think you would feel...

But I do feel. I feel everything Midori does.

A character with short, spiky brown hair and a futuristic, light-colored suit with black and yellow accents. The character is looking slightly to the right with a neutral expression. The background is dark and blurry, suggesting an indoor setting with some lights.

VECTORS

When the Loci appeared, many kind had no real defensive option. They rand rampant from one planet to the next. Once we would have turned to the Angels to save us, but they were lost in the breat burn.

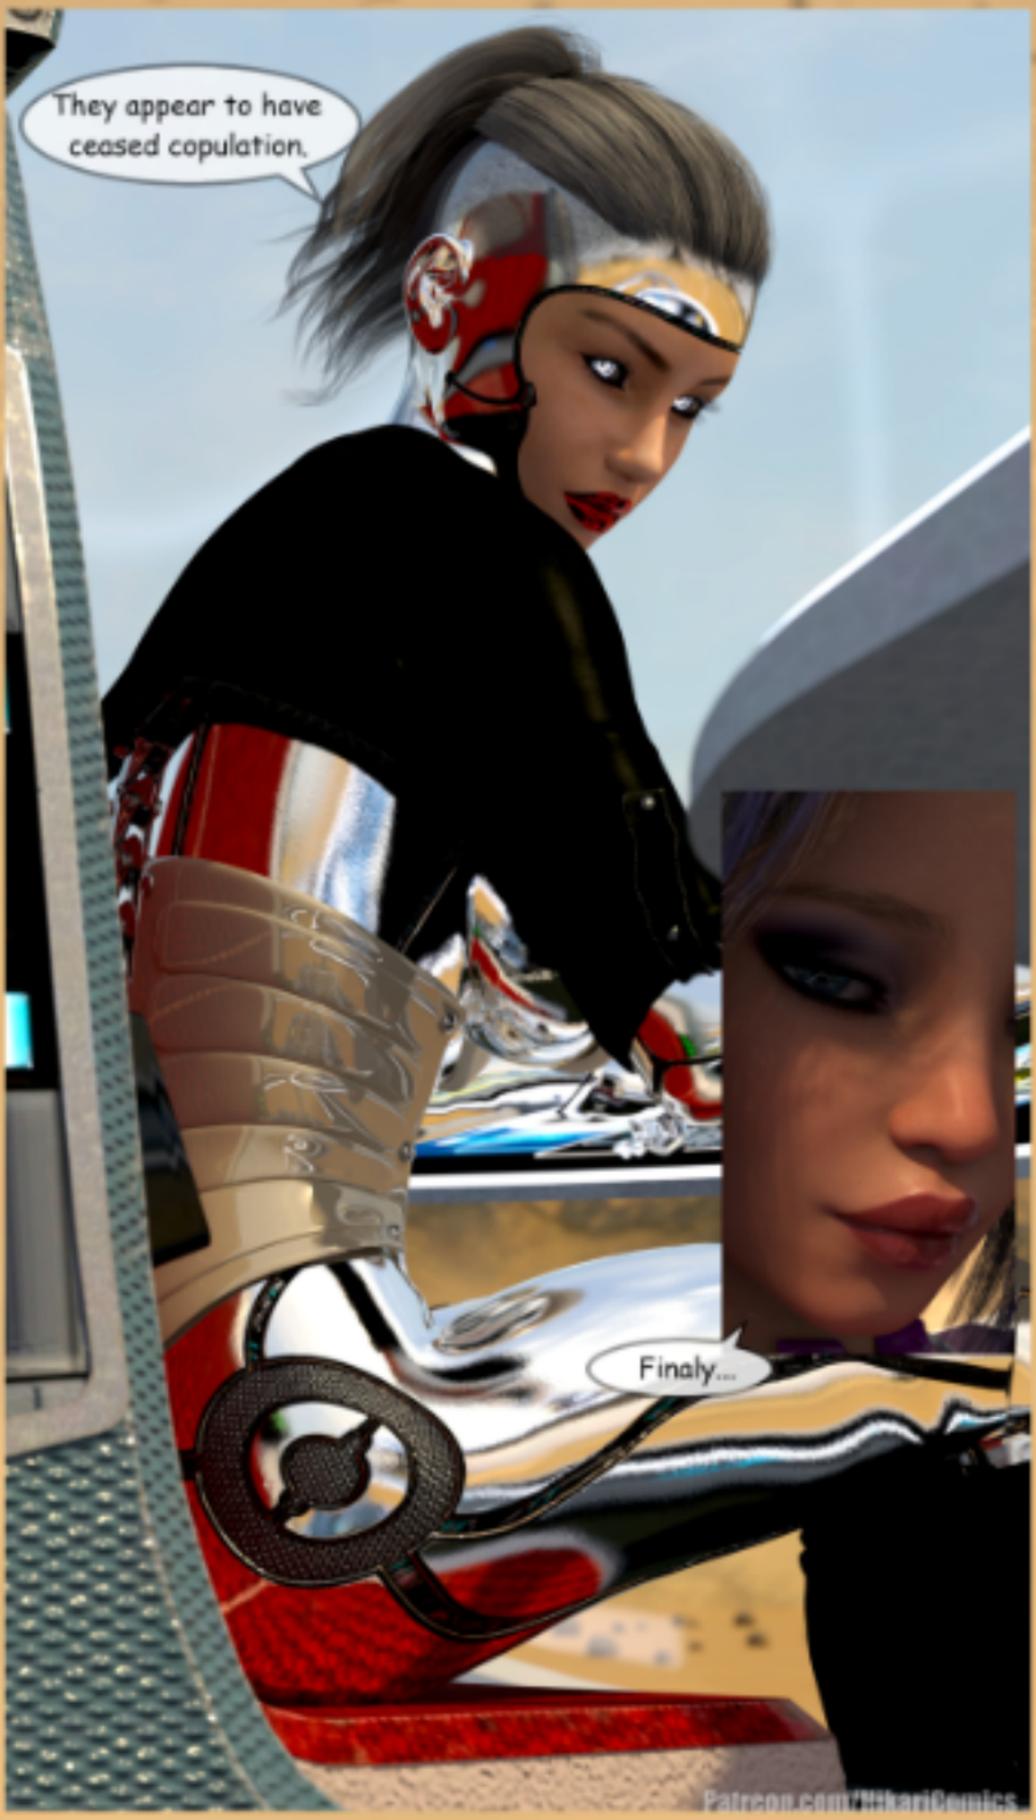

Our salvation came in the form of the Guardia, who wielded mighty towering giants in the image of the angels themselves! More complex and angile than any mechanized weapon we had seen before, the Light infused Vecotrs "LiV" halted the advance of the Loci, and saved the galaxy, for a time...

A woman with short, wavy purple hair and dark eye makeup is sitting in a futuristic cockpit. She is wearing a pink, form-fitting, sleeveless suit with purple accents. Her legs are crossed and she is looking towards the left. The cockpit features a large blue digital display with various gauges and data. A speech bubble is positioned above her head.

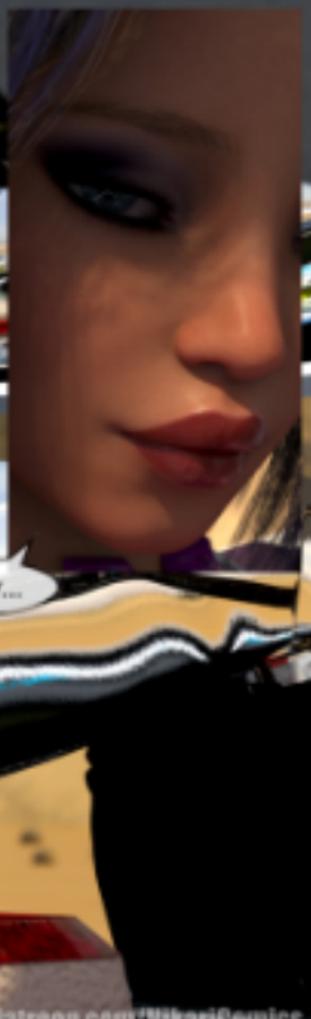

How long has he been in there?

A close-up of the woman's face, showing her purple hair, dark eye makeup, and red lips. She is looking slightly to the right. A speech bubble is positioned below her face.

Two hours, 13 minutes,
and 19.4 seconds my Lady.

They appear to have
ceased copulation.

Finally...

The hell am I doing here...?

You deserve better.

oh...

I can't do this anymore.
Even when your in my arms, I
can't get you back.

Well this is a problem...

Do I really want to be
the one to deal with this?

What's the problem?

I try and try... but I just can't.

What? Sasa?!

Performance issues then?

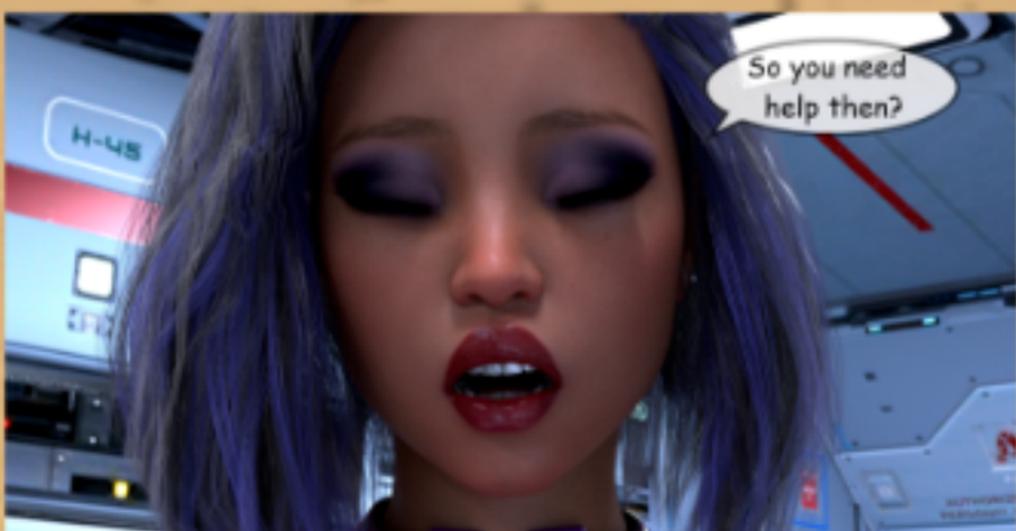

No! It's just...

I have so little left to give.

How is this man supposed to be so incredible when he's this pathetic.

So you need help then?

Fine.

Wait, no Sasa that's not what I...

Eeeeeeh...

You got this Sasa.

Ok.

If you swallow any of it...

Do not worry about us.
We know what we are doing.

Just let us know when it will come.

I may throw up on it...

Oh shit!

So hot... and it doesn't taste
like it smells... like rain in the desert...

Lady Sasayaki?

The *Shaddaow* cont.

Beyond the promise of a living death that keeps the Shaddaow perpetually enslaved, once changed, they can no longer influence their own emotions. They will continue to think and acquire knowledge freely, but any new emotional attachments come as a side effect of his or her relationship with a Guardia. This can lead to a virtual state of schizophrenia when two or more Guardia share the same Shaddaow.

Volunteers being a requirement, Guardia have been forced to die for lack of a willing Shaddaow to help regulate Mystik, rather than force hell on a victim.
