Pervywatch: Rebellion of the Apes Story

With so much war and fighting in the world, Winston fell into a deep depression. He retired from the Overwatch appealing to mental health reasons. He turned to books and studied every modern religion and even ancient religions, desperately seeking confirmation that evil is not the supreme power that rules the world. Finding no such answers, he then turned to weed, porn, and hentai videogames.

While playing hentai games, Winston realized that good and evil are flip sides of the same coin. When societies reject the individual's dark ambitions for sex and destruction, people create the very beasts that gnaw at the foundations of society. He realized that the Overwatch, fighting to protect humanity from evil, were the progenitors of evil.

Winston tracked down the other gorillas from the Lunar Horizon Colony.

Angry and shunned by their societies, these genetically enhanced gorillas were more than willing to join his cause. He organized them into a cult-like group with only one goal in mind: Destruction of human institutions and killing its most vehement protectors.

With the military experience he had gained in the Overwatch, Winston trained his gorillas to fight with modern high-tech weapons. They were ready to end humanity's oppression of the apes forever.

The gorilla death cult of Winston staged a false flag terrorist attack. They lured the Overwatch into a deadly ambush.

Only DVA and Mercy survived for the victory sex party.
