

The RoTov Confederacy and Uprising and Miners weapons pack

Written by: ET Templar

Beyond Civilized space, under the rule of Regional Governors, Penal labor colonies, and Corporate controlled outposts trouble brews. One such planet is RoTov home to 120 miners, 240 auxiliary staff of RoTov Industrial, however things are about to escalate into full blown rebellion and mayhem. Reynold Sledge keys a microphone button *a squelch is heard site wide before he speaks “ The Regional Governors won't listen they've ignored our strikes, they have taken our votes, and corporate money. It is obvious which one of those is more important to them, We have given our blood sweat, tears, and even the lives of our friends and family. As if that wasn't enough pay is cut and terrifs on our world are increased, they cannot get blood from a stone! Today we give them a pay cut, Today we will dictate our own freedom from the stony hands of corruption!

Miners Vibro Axe: A standard tool for a miner except it's made of an experimental metal (d8+8, Ignore all armor)

Colonial rifle: Just a standard 7.62x39 30-round magazine, semi-auto (1d6+2 damage per round fired per successful hit)

Gyro-jet demolition tool: Used to blast stone and bedrock it fires a titanium tip and can be set to explode on a timed detonation (d8x4 explosive damage half if it's not a good hit but the target is stunned for a turn per hit)

Vortex Wave rifle: Originally designed as a tool for dislodging ores from stone through firing condensed vortexes, how ever to a rebelling miner it can be used as a brutal weapon. (d20 roll d6 with damage if that number is odd add crippling wounds for ruptured organs, if a crit or decent hit can cause death in 2 turns if medical attention isn't sought)

Horizontal beam Cutter: A tool usually used in construction, and factory work it's normal purpose was to cut metal, through steel beams but now Rebels and criminals use it to cur through their enemies. (d20dmg, roll greater than 4 targets limb, head, or body is seared in half)

Of course you will have to scale the weapons and their capabilities to what ever pen and paper game you are playing. I hope you enjoy! There will be more added to this story as I find more time to write. Thank you for reading and supporting me.

God bless you, Good luck, and thank you so much for making this small section of my life so great.
