

## Game Flow & Dialouge:

1. ■ 1920 x 1080px

We start with a **Black Screen for a few moments,**

then the Logo

**Fades in** to the middle of the screen and plays the 'floating animation' you have currently.

## 2. **Play/Start** Button appears to the right how you have it,

which pushes the Logo to the left side of the screen.

(+ fade in Options below 'Play' if we end up needing any down the road)

Maybe later a third, 'CREDITS' option will be added to roll through SS subscriber names and us of course.

3.

Still a **BLACK SCREEN** at this point, after the player hits Play.

If music is playing for Title screen, at **THIS POINT**, it should fade out to Silence.

4.

**KEY: QuickFind**

- a. **Dialouge to be written on screen. Excluding b.c.+d.'s**  
(This should be **typed one letter at a time** as far as 'text animation' goes.  
[EXAMPLE](#) [Example.](#))
- b. **\*Enter\*** indicates the player pressing ENTER for the next Dialogue movement within the same box.

- c. *pause* indicates a pause, but no input from player before more text is animated.
- d. *indicates SHAKING text* [Example](#).
- e. *The text is LARGER* than the rest.
- f. Each NUMBER is a NEW Dialogue box, **or** a new Moment/action/task to input persay, into the game.

## 5

The text box appears in the center of the screen.

## 6
