Patient Name: Marsha Fenton
Visit Date: 7/2/2020

Thank you very much for letting me participate in the management of Marsha Fenton, who was seen by telephone consultation on 07/02/20. Marsha states that her IgA deficiency has been stable. She denies any upper or lower respiratory tract infection. She has been following strict avoidance measures from exposing to the COVID-19 infection. She is wearing the mask. She is staying home. Her son also stays with her, who is not working at this time. She denies any fever, chills, or rigors. She denies any upper or lower respiratory tract infection.

PHYSICAL EXAMINATION: Deferred at this time since this was done by telephone consultation.

IMPRESSION: Ms. Marsha Fenton has:

1. IgA deficiency, and
2. Chronic rhinosinusitis.

RECOMMENDATIONS:

1. Marsha is prone to develop recurrent infections. Therefore, I advised her to follow strict isolation measures from exposure to COVID-19 infection.
2. Since her son stays with Marsha, I strongly recommend that her son should do his work from home since it will reduce significantly the risk of exposure of Ms. Fenton to the COVID-19 virus.
3. A follow-up appointment has been scheduled in one year but I advised her to contact me as soon as the pandemic is over for further evaluation and treatment.
